

AI-based Web platform for supporting teaching by study and research paths

A tool for teachers with AI-based assistance

Designed to support the entire process of implementing SRPs in the classroom. Teachers can create a SRP as well as its individual classes.

Collaborative and easy-to-use application

Records activities undertaken by both teachers and students: questions that arose, outcomes, reference materials (books, websites, research articles) and group organization.

AI-generated reports

Once the groups submit their classwork, the teacher receives a report through both the platform and email, providing an overview of the topics covered in class, supporting planning and decision-making for the subsequent lesson.

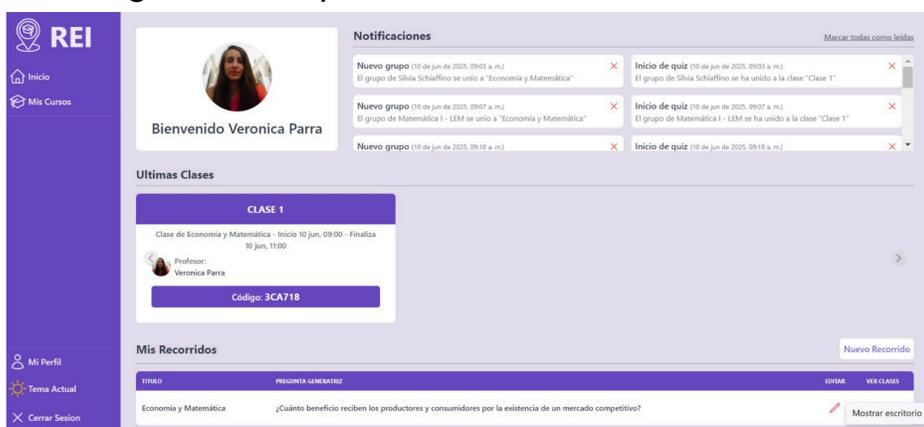

Web platform functionality

<https://reis.apps.isistan.unicen.edu.ar>

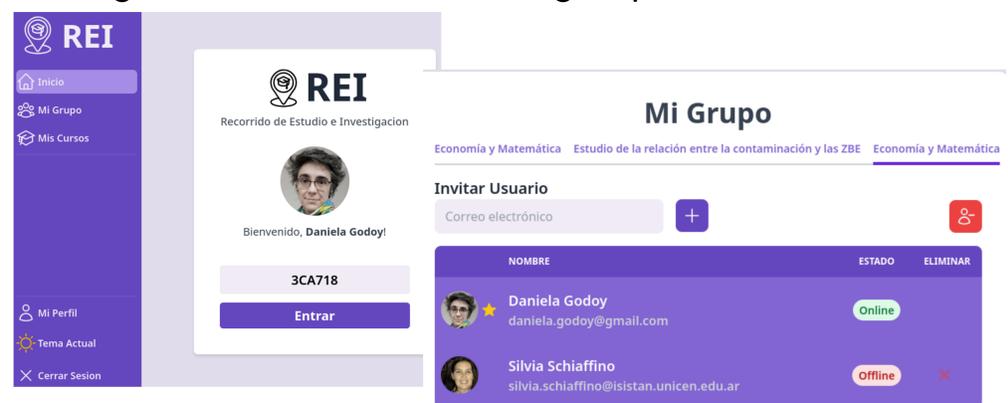

For teachers

- Manage and keep track of SRPs.

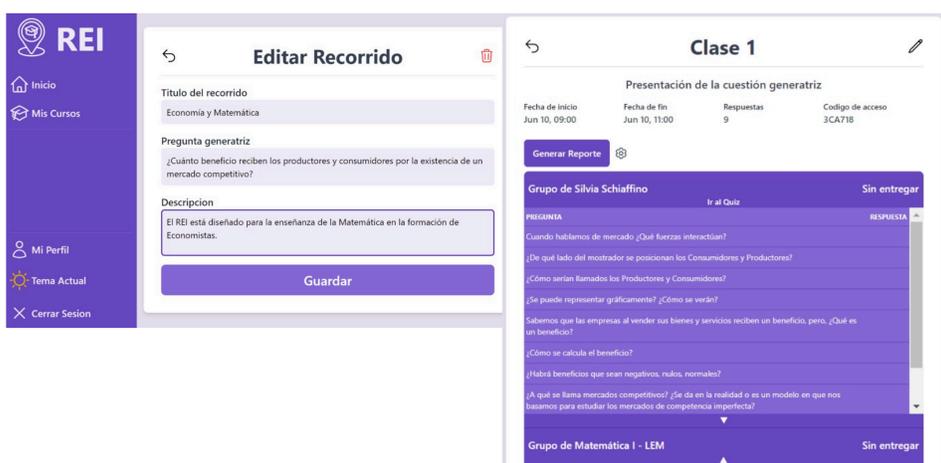

For students

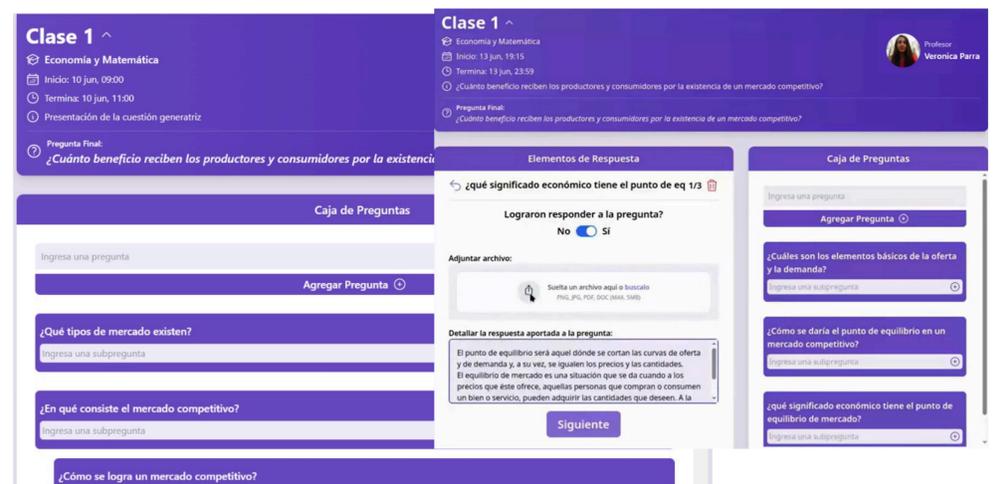

- Log into classes and create groups.

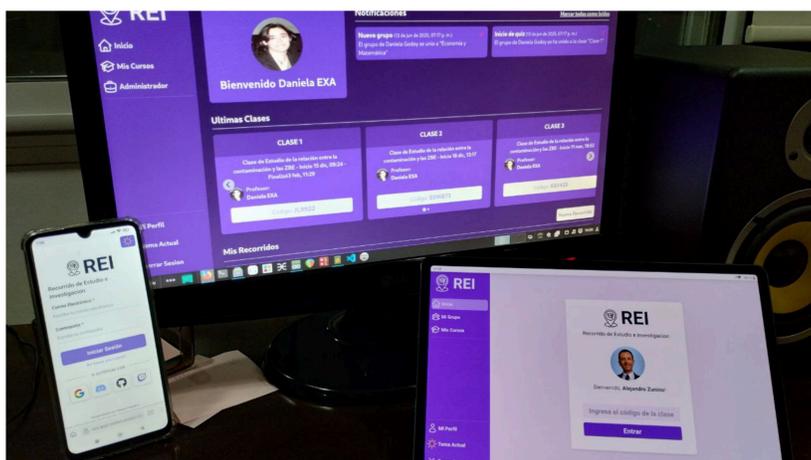

- Create and visualize SRPs and associated classes.

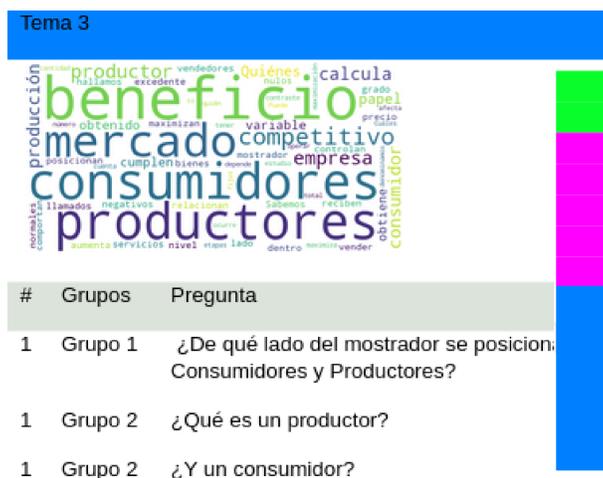

- Load questions and classwork outcomes.

Multi-platform application

AI-based assistance

- ¿Qué entendemos por beneficio?
- ¿Qué entendemos por "Consumidor"?
- ¿Qué tipos de mercado existen?
- ¿En qué consiste el mercado competitivo?
- Cuando hablamos de mercado ¿Qué fuerzas interactúan?
- ¿Cuándo un mercado deja de ser competitivo?
- ¿Cuáles son los supuestos de la competencia perfecta?
- ¿Cómo controlan los vendedores el grado del precio?
- ¿Cómo hallamos el excedente del consumidor y del productor?
- ¿Qué papel cumplen los productores en el mercado competitivo?
- ¿Qué papel cumplen los consumidores en un mercado competitivo?
- ¿Cómo se calcula el beneficio obtenido por los productores?
- ¿Cómo se calcula el beneficio obtenido por los consumidores?
